

Project Design Phase-II Data Flow Diagram & User Stories

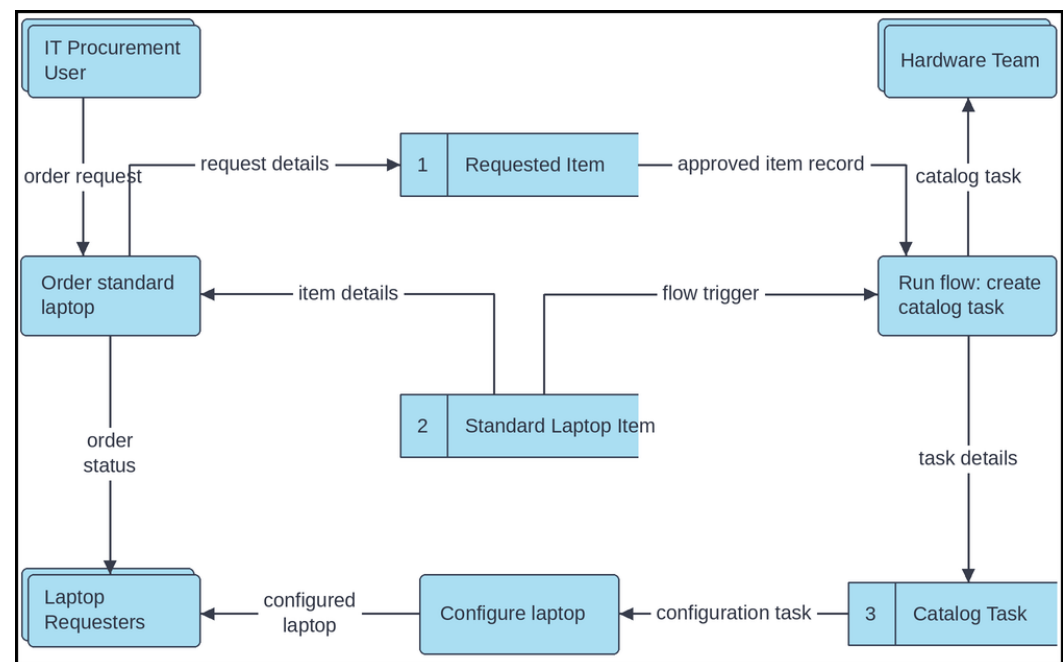

Date	30 September 2026
Team ID	MKU201Team26ab4da31a238dc999eb5cc00
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

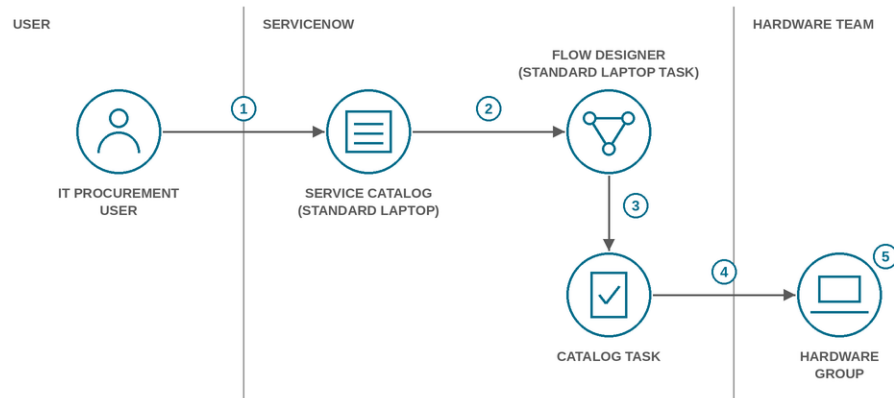

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

DFD Level 0: Standard Laptop Order Automation

Flow

1. User orders the Standard Laptop from the Service Catalog and the request is approved.
2. The request triggers the "Standard Laptop Task" flow in Flow Designer.
3. Flow Designer runs the Create Catalog Task action: "Laptop need to be Configured".
4. The catalog task is assigned to the Hardware group.
5. The Hardware team configures the laptop, so the user waits less.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
IT Procurement User	Standard Laptop Ordering	USN-1	As a member of the IT procurement team, I can order a Standard Laptop from the Service Catalog by clicking Order Now.	I can see the Order Status and the generated Request Number	High	Sprint-1
	Request Tracking	USN-2	As a member of the IT procurement team, I can open the requested item and view its Catalog Tasks so that I can track the configuration.	I can see the catalog task with its short description and assignment group	Medium	Sprint-2
Approver	Request Approval	USN-3	As an approver, I can approve the laptop request from the Approvers section of the request record.	The request is approved and the requested item is opened	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Administrator	Flow Creation	USN-4	As an administrator, I can create the "Standard Laptop Task" flow in Flow Designer with Service Catalog as the trigger (Global application, Run As System User).	The flow is saved and activated successfully	High	Sprint-1
	Task Automation	USN-5	As an administrator, I can add the Create Catalog Task action, mapping the Requested Item record and setting the short description to "Laptop need to be Configured".	A catalog task is created automatically for each approved laptop request	High	Sprint-1
	Task Assignment	USN-6	As an administrator, I can assign the created task to the Hardware group with the approval value set to Approved.	The task is assigned to the Hardware group	High	Sprint-1
	Flow Assignment	USN-7	As an administrator, I can assign the flow to the Standard Laptop catalog item under Process Engine after removing the existing automation.	The catalog item runs the Standard Laptop Task flow on every order	High	Sprint-2
Hardware Team Member	Laptop Configuration	USN-8	As a Hardware team member, I receive the "Laptop need to be Configured" task automatically so that I can configure the laptop when it arrives.	The task appears for the Hardware group without manual creation	High	Sprint-2
